

Invisible Drawings

What Do You Need

- Paper
- Pencil

Step 1

Choose your focus object. This can be something inside (like a bowl) or outside (like a tree).

Step 2

Colour in all the areas around your object. You can draw the edges of your object first if this helps, but make sure you don't colour in your object.

Things to think about

Have you seen anything new? Are there limits to the detail you can create?

What to make this more interesting?

Try again but this time use your other hand. Is this harder?
